Webinar “ABB Caldion® Room Temperature Controller”

Webinar – Competence Center Europe – Smart Buildings

Thorsten Reibel, Jürgen Schilder, Stefan Grosse, Martin Wichary & Ilija Zivadinovic

Agenda

Introduction, Projects and Product Overview
Technical Features and Connection Diagram
ETS Application
Commercial and Marketing Aspects

Webinar “ABB Caldion® Room Temperature Controller”

Introduction, Projects and Product Overview

Webinar “ABB Caldion® Room Temperature Controller”

Introduction

ABB Caldion® Truly The One

ABB Caldion® is a new range of fan coil room temperature controller that is part of the ABB i-bus® KNX portfolio and ClimaECO

It is a KNX RTC sensor for hotels, commercial buildings, offices and public buildings with a dual option on the type of installation (stand alone or KNX)

It has a built-in temperature sensor, LED display, buttons and Fan Coil actuator to provide an efficient and cost-effective solution

The perfect frameless casing and intuitive icons using capacitive touch make customer life smarter and easier than ever

Webinar “ABB Caldion® Room Temperature Controller”

Projects

Hospitality – Hotel guest room, common area

Commercial – Office building, common area

Webinar “ABB Caldion® Room Temperature Controller”

Product Overview

Black version

2 devices

- On/Off - **BS standard** with/without electrical heater
- 0 - 10V - **BS standard** with/without electrical heater

White version

2 devices

- On/Off - **BS standard** with/without electrical heater
- 0 - 10V - **BS standard** with/without electrical heater

Webinar “ABB Caldion® Room Temperature Controller”

Technical Features and Connection Diagram

Webinar “ABB Caldion® Room Temperature Controller”

Features

ABB Caldion®

- For BS (British Standard) installation
- Frameless design
- Large LED display, illuminated capacitive touch buttons
- Intuitive icons for ease of operating mode identification
- Display and button illumination – efficiency mode (sleep mode when not in use) / constantly on
- Display illumination and button illumination can be activated/deactivated via group object
- °C/°F/ECO button – long press/short press function
- First trigger command – awake device/awake and send command
- On/Off button – long press/short press function
- Recall of last setpoint after On/Off of device

Webinar “ABB Caldion® Room Temperature Controller”

Features

ABB Caldion®

- “In operation” monitor – antitheft and function monitoring
- In built temperature sensor for accurate room temperature measurement
- Lock and unlock of the device via group object to prevent unauthorized adjustment
- Compatible configuration similar to Fan Coil Controller FCC/S, also forced operation, temperature limitation or valve purge, PI-Controller, PWM, ...
- Two Binary inputs – temperature sensor/binary input/window/alarm function selectable
- ABB Caldion® can work as standalone device without KNX power supply thanks to power connection
- Occupancy presence detection logic: combination of door contact and presence detector to function as keycard holder for room occupancy status

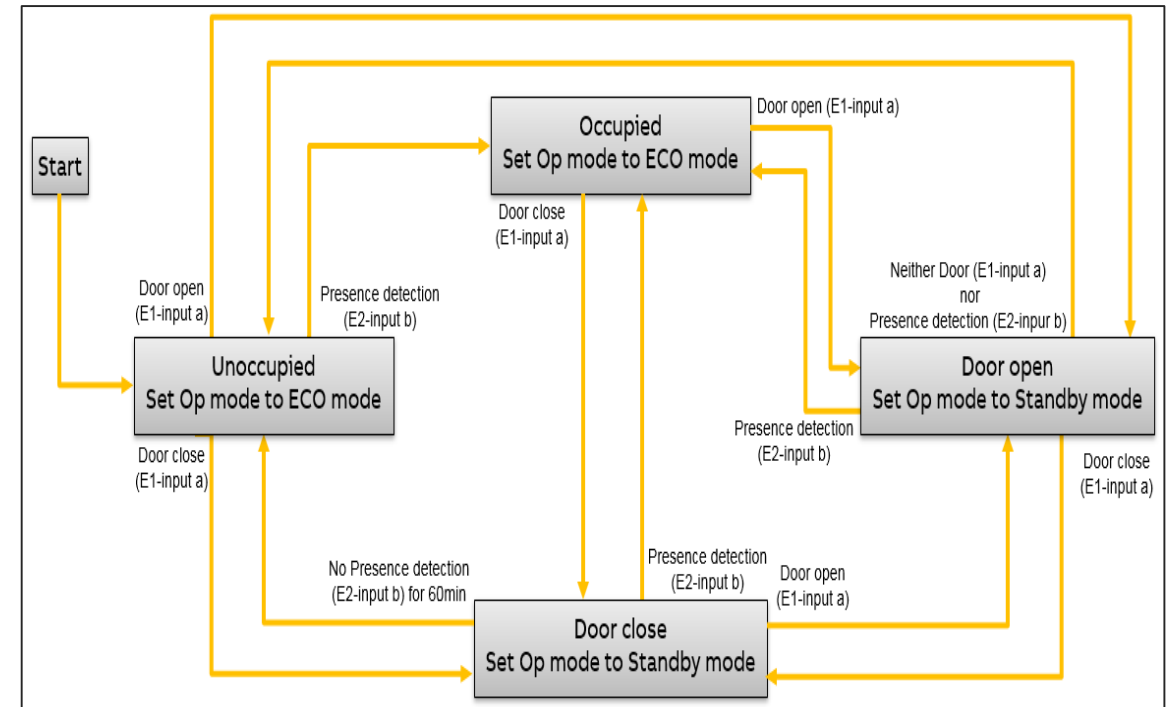

Webinar “ABB Caldion® Room Temperature Controller”

Features

ABB Caldion®

- Occupancy presence detection logic – with the combination of door contact & presence detector signal, ability to determine the status of guests in the room (room occupancy status)
- Change between ECO, Standby and Comfort mode
- Door contact and presence detector signal can either be received by group object or physical input via E1 and E2 binary input
- Detection checking duration is configurable via ETS
- In 2 pipe configuration only, VB/RO output can be configured as an relay output to energize the power for the room (via a external contactor) like keycard holder
- When logic is active and E1 and E2 are not configured as physical input, it can be used for other binary input functions

Solution ready for non keycard holder installation in hotel guest rooms

Webinar “ABB Caldion® Room Temperature Controller”

Connection Diagram - On/Off version and 3 step fan

2 pipe/electrothermal valve

Standalone default
E1 – Window contact
E2 – Temperature sensor NTC 10K

2 pipe/3 point motor valve

Standalone default
E1 – Window contact
E2 – Temperature sensor NTC 10K

2 pipe/electrical heater

Standalone default
E1 – Window contact
E2 – Temperature sensor NTC 10K

4 pipes

Standalone default
E1 – Window contact
E2 – Temperature sensor NTC 10K

Webinar “ABB Caldion® Room Temperature Controller”

Connection Diagram - 0-10V version and 3 step fan

2 pipe/0-10V valve

Standalone default
E1 – Window contact
E2 – Temperature sensor NTC 10K

2 pipe/0-10V valve + electrical heater

Standalone default
E1 – Window contact
E2 – Temperature sensor NTC 10K

4 pipes /2 x 0-10V valves

Standalone default
E1 – Window contact
E2 – Temperature sensor NTC 10K

Webinar “ABB Caldion® Room Temperature Controller”

Architecture

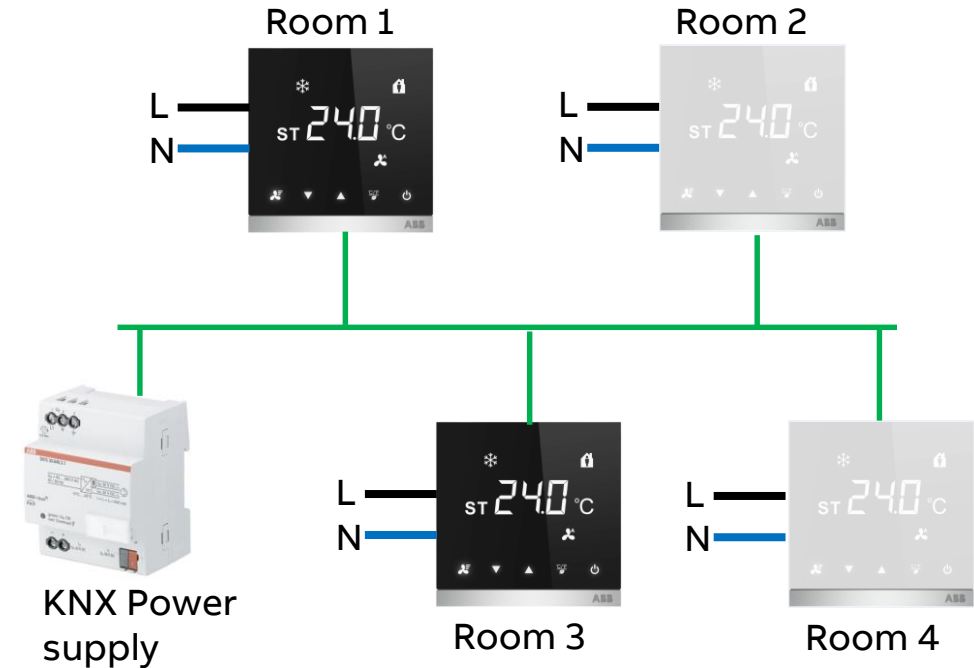

Standalone configuration

- Configuration via DIP switches
- works without KNX power supply
- All options as KNX device with configuration via ETS

DIP Switch	1	2	3
KNX	1	1	1
Cool - 2 pipe (on/off, 0-10v)	1	1	0
Cool - 2 pipe 3pt (on/off)	1	0	1
Heat - 2 pipe (on/off, 0-10v)	0	0	1
Heat - 2 pipe 3pt (on/off)	0	1	0
Heat - 2 pipe w. heater (on/off, 0-10v)	0	1	1
Cool/Heat - 4 pipe (on/off, 0-10v)	0	0	0

KNX configuration

Flexible!! Install as standalone and be future proof to upgrade as system control

Webinar “ABB Caldion® Room Temperature Controller”

ETS Application

Webinar “ABB Caldion® Room Temperature Controller”

ETS

ABB Caldion®

ETS Application similar to Fan Coil Controller FCC/S

Parameter block ‘General’

– Various parameter for display and buttons

- Display Illumination
- On/Off operation
- Device lock/unlock
- Temperature Display
- ...

2.2.1 CAR/U4 Caldion® Room Temperature Controller, On/Off, FM > General

General	Sending and switching delay after 230V recovery	2 s
– Application	State after sending and switching delay has elapsed	<input checked="" type="radio"/> Last value received <input type="radio"/> Ignore received values
Application parameters	Limit number of telegrams	<input checked="" type="radio"/> No <input type="radio"/> Yes
Device function	Enable group object "In operation", 1-bit	<input checked="" type="radio"/> No <input type="radio"/> Yes
– Temperature controller	Display illumination	<input type="radio"/> Illumination efficiency <input checked="" type="radio"/> Constantly on
+ Temperature controller	Display illumination activate/deactivate by group object	Inactive
+ Setpoint manager	Button icon LED illumination	<input type="radio"/> Illumination efficiency <input checked="" type="radio"/> Constantly on
+ Monitoring and safety	Button icon LED illumination activate/deactivate by group object	Inactive
+ Valve A	Button icon first touch function when device is in standby mode	<input type="radio"/> Awake and send command <input checked="" type="radio"/> Awake device
+ Valve B	Switching on/off control of RTC	<input checked="" type="radio"/> Short press-On/Off, Long press-mode select <input type="radio"/> Short press-mode select, Long press-On/Off
+ Fan output	On/off reaction	<input checked="" type="radio"/> Recovery last setting <input type="radio"/> Default
+ Electric heater relay output	On/Off reaction by group object	Inactive
+ Setpoint adjustment	Device to be lock/unlock by group object	Inactive
+ Input a	Temperature display	<input type="radio"/> Setpoint temp <input checked="" type="radio"/> Actual measure temp
+ Input b	Temperature display units	<input checked="" type="radio"/> °C <input type="radio"/> °F
+ Internal temperature sensor	Switching C/F + ECO control of RTC	<input checked="" type="radio"/> Short press for C/F - Long press for ECO <input type="radio"/> Short press for ECO - Long press for C/F
	Switchover temperature display units via group object	Inactive

Webinar “ABB Caldion® Room Temperature Controller”

ETS

ABB Caldion®

- Occupancy presence detection logic (Block Application Parameters)
 - Duration of first checking of presence, e.g. 10 min
 - Duration of second checking of presence before activating ECO mode, e.g. 60 min
 - Presence- and door contact detection via physical device input or group object
 - In 2 pipe configuration only, VB/RO output can be configured as an relay output to energize the power for the room (via a external contactor) like keycard holder

Occupancy presence detection logic	<input checked="" type="radio"/> Activate <input type="radio"/> Deactivate
Door contact detection	<input checked="" type="radio"/> Via physical device-input A <input type="radio"/> Via group object
Duration for first checking of presence	<input type="text" value="00:10:00"/> hh:mm:ss
Duration for second checking of presence before activating ECO mode	<input type="text" value="01:00:00"/> hh:mm:ss
Presence detection	<input checked="" type="radio"/> Via physical device-input B <input type="radio"/> Via group object
To include physical output VB/RO for power energization	Deactivate

Further information

Product Overview

[LINK](#)

Features:

- An integrated (control and actuator) room temperature controller
- One device supports multiple types of application
- Option to select standalone or KNX configurations
- Enhance function configurable via ETS application

Benefits:

- Easy replacement for existing conventional thermostat
- Cost-effective installation
- Intuitive design for ease of controls
- Simple and effective application with option for expansion

Product overview

ABB Caldion®, part of the ABB I-bus® KNX portfolio is a Room Temperature Controller for fan coil units with either 2 pipes, 2 pipes with electric heater or 4 pipe system application. Flush Mounted, BS standard; it can be installed as a standalone configuration or with built-in integrated bus coupling as a KNX device. It is equipped with a temperature sensor and 2 x binary input for either presence detection, window, dewpoint alarm or condensate alarm. It has an integrated actuator for valve control of on/ off or 0-10V with 3 x fan speed control. It has dedicated capacitive touch control button for intuitive control and mode operation selection. Its frameless design equipped with a large display ensures the ease of viewing and elegance to complement the surrounding.

Technical data:

Power supply	Rate voltage	AC 230V(min.AC 110V),50/60 Hz
	Power consumption	Max. 4 VA
	Maximum allowable Input/load/fan-valve +electric auxiliary heat/current through phase Input(L/terminal KNX bus voltage	Max. 7 A
Wire connection	Wiring cross section on L,N,F1,F2,F3,VA,VB	1 x 0.5 ... 2.5 mm²
	Wiring cross section on GND, EI, E2, 0-10VA, 0-10VB, KNX+, KNX-	stranded wires 1 x 0.5 ... 1.5 mm²
Degree of protection	IP 20	EN 60529
Protection class	Overvoltage category III	EN 60664-1
	Operating temperature range	-5°C to +50°C
Ambient conditions	Transport and Storage temperature	-25°C to +70°C
	Humidity max range	not more than 98%, no dew permissible
	Maximum air pressure of atmosphere	up to 2000m
Outputs	Control output Rating [Resistive(Inductive)] on F1, F2, F3-N, VA/VB -N, RO-N	AC 230 V / Min. 8.3 mA, Max. 5(2) A
	Max. total load current through terminal "L" (Fx + Vxx)	Max. 7 A
Inputs	Control output load on 0-10VA-GND 0-10VB-GND	SELV DC 0...10 V/ 1.5 mA(Max) / > 10 kohms
	Input port EI & E2	10V/1mA
	Input cable length	Maximum 30 m
